COLD-FOGGING

VIRAL & BACTERIAL DECONTAMINATION

A Better Way To Clean, Disinfect & Sanitize

Our product is an EPA registered hospital grade disinfectant & sanitizer, and our process of “Cold-Fogging” by atomization completely eliminates airborne contaminants while sanitizing porous and non-porous surfaces. The product dissipates quickly and surfaces do not require rinsing afterwards.

The application time is quick and easy, no need to close the facility for days at a time, our process can sanitize and decontaminate an entire building and be reopened for business in just a few hours with a savings of over 70% of conventional cleaning costs. Call us for a “FREE” demonstration!
