

IAQC MOLD REMEDIATION
PROTOCOL
www.in-doorairquality.com

Thank you for your interest in the (Medi-Mist) Viral & Bacterial Decontamination Program designed to sanitize and eliminate the MRSA Staph Virus, The Swine Flu, and up to 135 other potentially harmful organisms. In-door Air Quality Consultants is ready to help with your fight against infectious diseases in your Facility.

Our “Medi-Mist” process sanitizes all hard and soft surfaces without hand wiping and sanitizes the air at the same time. The process is quick, clean, and very affordable. There's no hand wiping, rinsing, or moving items to get to every surface, we simply aerosolize our product and within seconds can cover 100 percent of the intended area and the contents inside. Imagine, the time and money your staff can save by not having to hand wipe and move every item, not to mention eliminating the dirty rags and mop buckets that may be spreading the germs from surface to surface.

Keep us in mind should the need arise in your work place or facility. We are local and have trained personal standing by 24/7. Don't forget to ask about our multi-use discount program. We're looking forward to helping you, help your customers and employees.

Sincerely,

Charles D. Kester
President
