THERMAL FOGGING

VIRAL & BACTERIAL TREATMENT

A Better Way To Clean, Disinfect & Sanitize

Our product is an EPA registered hospital grade disinfectant and sanitizer, and our process of "Thermal Fogging" covers 100% of the intended area in minutes including porous and non-porous surfaces as well as airborne particulates. The application time is minimal and the product dissipates quickly with less down time. No more week long closures to sanitize the facility, our process can sanitize an entire building and be reopened for business in just a few hours.
